The claims in this application are 1-56.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9, drawn to a hematopoietic stem cell, a neonated or fetal blood cell and a cryopreservative, classified in Class 435, subclass 240.2.

II. Claims 10-13, drawn to a recombinant cell, classified in Class 435, subclass 272.2.

III. Claims 14-25, drawn to methods for obtaining (preserving) cell, classified in Class 435, subclass 240.45.

IV. Claims 26-56, drawn to methods of treating a human, classified in Class 424, subclass 101.

The inventions as set forth above are properly restrictable because they involve distinct inventive concepts under 35 USC 103; involve distinct fields of search; and would involve distinct considerations as to patentability. Restriction is clearly proper.

Because these inventions are distinct for the reasons given above and have a separate status in the art as shown by their different classification restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed.

Art Unit 182

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

A telephone call to the firm of Pennie and Edmonds did not result in a telephonic election, accordingly the requirement was written as above.
